

Myth 1: “Renewables are too expensive”

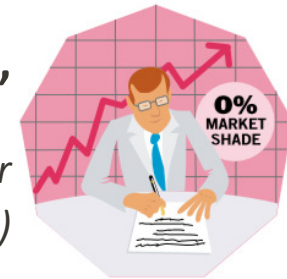

Authors: Radovan Kopecek

International Solar Energy Research Center Konstanz

Myth 4: “Renewables cannot survive without subsidies”

Author: Werner Platzer

Fraunhofer Institute for Solar Energy Systems (ISE)

Myth 8: “Renewables destroy jobs”

Author: Andrea Michiorri

MINES ParisTech

Myth 9: “Renewables will decrease the competitiveness of the EU’s economy”

Author: Ian Forbes

Northumbria University

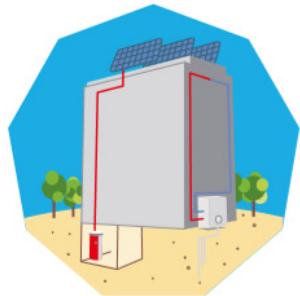

Myth 3: “Producing renewables consumes more energy that it delivers”

Authors: Juan Camilo Gómez Trillos

DLR Institute of Networked Energy Systems

Myth 5: “Renewables are as harmful for the environment as conventional energy sources”

*Author: Paul McKeever, Simone Stuart-Cole
Catapult Offshore Renewable Energy (ORE)*

Myth 7: “The importance of thermal renovation of buildings is overrated”

Author: Werner Friedl

Austrian Institute of Technology

Myth 2: “Renewables are not reliable”

*Authors: Venizelos Efthymiou, Christina Papadimitriou
FOSS – Research Centre for Sustainable Energy*

Myth 6: “Renewables cannot satisfy the growing demand for energy”

*Author: Rainer Janssen
WIP Renewable Energies*
